

Balloon Release Guidelines

- Only natural latex rubber balloons may be used for releases, no Mylar® or foil balloons.
- All components used in balloon releases must be biodegradable.
- Balloons must be hand tied; plastic valves may not be used.
- No ribbons or strings may be attached to the balloons.
- Any attached labels must be of paper and should be attached via the hand tied balloon knot.
- Only helium gas should be used to inflate the balloons.
- Balloons must be inflated as close to the time of the ceremony as possible.
- Balloons larger than 12” may not be released.
